

## multicolor MULTICOLOR HOT STAMPING FOILS

While single color foils have traditionally been a common choice for textile and leather printing companies, there's a noticeable shift towards the adoption of Multicolor Hot Stamping Foils, reflecting a new industry trend.

These versatile foils offer a multitude of effects like metallic, semi metallic, hologram, uncoated and white/black/brown lac back coated. Each available in a wide array of colors and adorned with intricate patterns like animal, abstract, batik, floral, degrade, plaid, crack-marble, brush, moire, texture, camouflage, stripe and patchwork.

UES is confident to fulfill diverse customer needs, with an extensive selection of over 300 multicolor patterns readily available in stock, including more than 30 oil effect foils.

Even though the use of specialized hot stamping foil calenders is advised for transfer making, sublimation calenders can also be utilized with proper settings. Operators must fine-tune these parameters to match the heat transfer values obtained from rotopresses.

### Application Parameters

#### Flat Press

Temperature	Pressure	Contact time
150°C	6 bar	5-6 sec

#### Rotopress

Temperature	Pressure	Speed
160°C	6 bar	3-5 m/min

### Available Quantities and Sizes

CORE	LENGTH	WIDTH
1" core	100 m	150 cm
3" core	500/1000/3000 m	150 cm

Customer-specific length can be produced upon request

All foil thicknesses are 12 microns

### Conformity

- Water based adhesives
- Plastisol adhesives
- Polyurethane adhesives
- Crystal foil compatibility
- Serigraphy prints
- Roll to roll rotary prints
- Spray applications
