

# UES foils

## STANDARD HOT STAMPING FOILS

Over 150 different colored standard hot stamping foils are available for textile and leather.

Metallic (S series), Soft Metallic (SM series), Semi Matt (YM series), Matt (M series) & Hologram (H series) are categorized as Standard Series.

Except whitening (S-81) and shining (S-82) products, all Metallic and Soft Metallic series mask the base color with their own unique shiny color.

Matt and Half Matt series offer more transparency than metallic series. Certain foils have the ability to change color depending on the substrate they are applied to.

Hologram series contain metallic plain, transparent, patterned, broken glass and bead types

### Application Parameters

#### Flat Press

##### Temperature

150°C

##### Pressure

6 bar

##### Contact time

5-6 sec

#### Rotopress

##### Temperature

160°C

##### Pressure

6 bar

##### Speed

3-5 m/min

### Available Quantities and Sizes

CORE	LENGTH	WIDTH
1" core	100 m	150 cm
3" core	500/1000/3000 m	150 cm

Customer-specific length can be produced upon request

All foil thicknesses are 12 microns

### Conformity

- Water based adhesives
- Plastisol adhesives
- Polyurethane adhesives
- Crystal foil compatibility
- Serigraphy prints
- Roll to roll rotary prints
- Spray applications
